Atlantic City Waiting to be Told

Three hundred people gathered at Resorts Casino & Hotel to preview "Atlantic City Waiting To Be Told," a documentary by Brendan Jerome and Nick Palmisano of the 11th Floor Creative Group. The documentary is being produced by the nonprofit Schultz-Hill Foundation which supports local historians, artists and educators.

"We realized that no one was preserving the changes taking place in Atlantic City," said Gary Hill. "This was an opportunity to look into Atlantic City's past and compare it to the exciting present—and future."

The group is seeking additional funding for the documentary, which they hope to take around the country when completed. For information, contact acfilms@11thfloor.com or ghill@1616pr.com.
